

AXIAL COMPRESSION TOOL

Fully adjustable for various connectors

DESCRIPTION

The PV300 is a fully adjustable axial compression tool. Four different settings on the tool offer an experienced installer the flexibility to adjust the tool to fit numerous different connector types. The PV300 is precisely designed to be used on the PerfectVision PV6UE-05, PVM2-F, PVM2-BNC, PVM2-RCA, PV11U, PV6U-BNC and PV6U-RCA connectors. The PV300 can also be used to install several other axial connectors including the most common 21.0mm connectors that are available in the telecommunications industry today.

SPECIAL FEATURES

This one adjustable axial compression tool can be used to install several different types of axial connectors along with a wide variety of PerfectVision connectors.

LIMITATIONS

Not for use by casual installers or homeowners.

SHIPPING CONFIGURATION

One PV300 tool and users guide in a box.
